COUNTERFEIT PARTS COMPLIANCE STATEMENT

Control Flow, Inc. (CFI) will not knowingly purchase or utilize a counterfeit part, including electronic parts or components in any product or service it undertakes, for its customers, including civilian and U. S. Government entities

To accomplish this, CFI has a documented policy and program as part of our Quality and Procedures manuals to ensure that such counterfeit parts and components are not purchased; are detected; and that such parts and components are prevented from entering the CFI supply chain or incorporated into any CFI product. Further, CFI maintains an Approved Suppliers List and surveys our suppliers on a regular basis and advises them via our purchase order system that we will not accept or utilize any counterfeit parts or components that contain any counterfeit parts. Additionally, CFI as a policy only purchases such parts and components from the Original Equipment or Component Manufacturer or an OEM approved distributor of such parts and components.

Accordingly, we have advised the suppliers who are included on our Approved Supplier List, regarding the CFI policy and its ban on the use of any Counterfeit Parts. Based upon our supplier surveys and this notification to our suppliers, CFI has determined that our suppliers have not supplied any Counterfeit Parts, or components that utilize such counterfeit parts to CFI.

Control Flow, Inc. will continue to work with our suppliers, keeping them informed of our policy regarding the use of Counterfeit Parts and components in order to avoid any such use in our products. Should any change in this statement occur based upon new information or developments within our supplier base, we will immediately advise our customers.

Please direct any questions regarding this statement to Control Flow, Inc.
